

Appendix 3: Sewer Connection Points

Barcor Trust was commissioned to prepare a civil services report for the proposed sub-division of Erf 3535 in Secunda.

The sewer connection points will comply to SANS 1200LD and the “Guidelines for Human Settlement Planning and Design” (Red Book, Chapter 10 -Sanitation -Appendix C) as published by CSIR Building and Construction Technology. Final connections will only be designed once residential plans have been finalised. However, compliance to SANS 1200LD and to the “Guidelines for Human Settlement Planning and Design” confirms that the sewer connection points will adhere to best practice.

Drawings on next page.
